

Optional Dust Control Gasket

Flange Gasket Identification and Selection

Two flange gaskets are available for mounting between the Pivotal Edge Cover assembly and trailer.

- In most instances, using PN 104203 will greatly assist in dust control during loading.
- When loading sand, PN 102500 (larger opening) is recommended.

P/N 102500 recommended for sand	P/N 104203 recommended for materials <u>other</u> than sand
 <p>A technical drawing of a circular flange gasket. It consists of two concentric circles. A double-headed arrow spans the diameter of the inner circle, with the text $\phi 19.175$ centered below it.</p>	 <p>A technical drawing of a circular flange gasket.
